

ABOUT US

Since 2005, we've had one focus – making it easier for state government agencies to deliver impact. We provide you with crucial software products and services – quickly, securely and tailored to your needs.

Our products use the latest Microsoft® software products and are designed to be implemented quickly; yet can be configurable and customized to meet state-specific needs and requirements.

 **Harvest**TM
BY MTW SOLUTIONS

**CHILD NUTRITION
MANAGEMENT FOR
STATE AGENCIES**

OUR SOLUTION

A secure, cloud-based solution designed to help state agencies and School Food Authorities efficiently manage child nutrition programs with confidence.

HARVEST DELIVERS

Harvest delivers a modern Child Nutrition Program management platform that brings agencies, School Food Authorities, and program data together through intuitive workflows and powerful reporting.

With strong cybersecurity, scalability, and integration, Harvest helps agencies meet IT standards and improve outcomes.

OUR VALUES

Deep relationships with state agency partners drive us to be proactive and responsive.

HARVEST SUPPORTS

- Child and Adult Care Food Program (CACFP)
- National School Lunch Program (NSLP)
- School Breakfast Program (SBP)
- After School Snack Program (ASSP)
- Fresh Fruit & Vegetable Program (FFVP)
- Seamless Summer Option (SSO)
- Summer Food Service Program (SFSP)
- State Match (SNP and SFSP)
- Local Foods Incentive

KEY INTERFACES TO IMPROVE DATA QUALITY

- API call to external USPS address validation service
- API call to SAM.gov for UEI verification
- API call to USDA Data Validation Service (DVS) to ensure annual Verification Report data quality

WHY HARVEST?

Harvest is a secure, cloud-based solution built on Microsoft™ Azure for state child nutrition programs and School Food Authorities.

Real-time validations and edit checks help agencies capture accurate applications and streamline reviews.

Integrated payment and external data interfaces strengthen data integrity, improve processing efficiency, and reduce audit risk.

Business Intelligence Semantic Model-powered reporting provides timely insights to monitor performance, identify trends, and respond to program needs.
